

Personal Pronunciation Clinic - BASIC Programme

What are we aiming for?

We aim for '*intelligibility*'. You don't need to sound 'British' or to sound 'American'.

You need to speak so that people can *easily understand* you.

We listen for *competencies* and *challenges* when we analyse your speech.

We can work with you on:

- specific English sounds (*phonemes*)
- syllables and word-level elements
- thought-groups, sentence stress, intonation and stress-timing
- any particular mother tongue or personal tendencies which may interfere with your listeners' understanding

What will we do in your Personal Pronunciation Clinic BASIC Programme?

We will:

1. **conduct** a **Personal Diagnostic Interview** with you about the speaking challenges you face.

This will take 20 to 25 minutes – by voice or video link. You will receive immediate informal feedback and advice, followed by more detailed specific written feedback.

2. **customise** two **Personal Practice Activities** designed to help you to achieve **permanent** progress.

- We will send you a *personalized* written activity.
- You will *complete* the activity and *return* a sound file.
- We will respond with a short video offering personal feedback.

- a. **Personal Practice Activity 1**

Personal Instructions ➡ Your Response ➡ *Our Video Feedback*

- b. **Personal Practice Activity 2**

Personal Instructions ➡ Your Response ➡ *Our Video Feedback*

3. conclude with a live 20-minute **Personal Pronunciation Tutorial** discussion.

This will include

- a. a written **Personal Pronunciation Clinic** Programme Summary
- b. a list of *specific* personal suggestions for your future use.
- c. a reference list of *general* additional resources.
